ABOUT ME

Undergraduate learner and practical digital project builder focused on e-commerce, online stores, digital business and web projects. Hands-on experience with Shopify store setup, product research and sourcing, pricing and offers, payment/marketing configuration, responsive UI prototyping and AI-assisted creative workflows. Currently developing technical skills in React, TypeScript, Vite, Tailwind CSS, Shadcn UI, Supabase, JavaScript and no-code automation.

EDUCATION

CURRENT

Undergraduate learner

Academic Study & Research

Academic writing, source review and thesis research, including ethnographic work on Kurichya social organization, economic life and indigenous knowledge in Kerala.

PROJECTS & PRACTICAL EXPERIENCE

2026

Urdu - Booking Platform

Designed a mobile-first Ramadan mosque speech-slot platform concept for Kerala. Defined Muta'allim, admin and committee workflows, slot scheduling, booking/cancellation rules, trust-score logic and payments. Building with React, TypeScript, Vite, Tailwind CSS, Shadcn UI, Supabase, Razorpay and Vercel. In development.

2025

GenCart - Shopify E-commerce Project

Configured store concepts for kitchen utilities, jewellery and home decor. Worked on product sourcing, pricing, shipping thresholds, bundles, trust elements, payment gateways, customer privacy/marketing settings and storefront UX. Store is no longer active.

2026

Digital Products & Creative Work

Created planner/digital-product concepts and explored branding, marketplace presentation, copy, AI-generated visual concepts and audience acquisition workflows.
